

Innovative Heat Spreading Technology

- Innovative
- Highly Efficient
- Low Wattage

HEATING INNOVATION:

Greenheat Technology's patented powerblanket™ brand introduces an innovative design perfect for heat soaking bagged asphalt, bulk epoxy and various other temperature sensitive materials. The powerblanket™ Hot Box is an ecofriendly and innovative design, with our patented heat spreading technology, it is finally possible to achieve and maintain an even, consistent heated environment. Using only 120V or 240V, it is the most efficient and energy saving solution on the market today. The powerblanket™ Hot Box is lightweight, portable and durable, requiring virtually no maintenance, saving time, money & labor.

HOT BOX:

The powerblanket™ Hot Box is an innovative, highly efficient and low wattage heating system. The patented heat spreading technology and structured box design creates a controlled environment perfect for heat soaking temperature sensitive materials.

INSULATED STRUCTURED BOX DESIGN

Creates a controllable heated soaking environment for pallets and bulk materials.

COMPACT PORTABLE DESIGN

Easy set up and foldable design is portable and user friendly.

STANDARD SIZES AVAILABLE

3x4x4 & 4x4x4, available with two or four heated panels.
120 volt standard / 240 volt available.

THERMOSTIC CONTROLLER (up to 200°)

Adjust to desired temperature.
Maintain a constant and safe temperature.

SAFETY

Safe for use on most materials – asphalt, paint, resin, epoxy.

LOW WATTAGE

Energy efficient reducing costs.

INSULATED

Create, control & maintain a heated environment for fast and effective heat soaking.
Lowers energy consumption.

MALE & FEMALE END CORDS

Plug multiple boxes together on same 20 amp circuit.
